

## Programming Paradigms

### Class Activity #4

**Q1:**

Your actual input/output pairs will likely differ. This is just an example with two input/output pairs.

```
var assert = require('assert');
var question2 = require('./question2');

describe('findMaxConsecutiveOnes(arr)', function() {
  describe('basic tests', function() {
    it('should return 2', function() {
      assert(question2.findMaxConsecutiveOnes([1,88,1,1,0,1]), 2);
    });
    it('should return 5', function() {
      assert(question2.findMaxConsecutiveOnes([1,1,1,1,1]), 5);
    });
  });
});
```
